

The Gamma Function $\Gamma(z)$ on the Complex Plane

$$\Gamma(z) = \int_0^\infty t^{z-1} e^{-t} dt, \Re(z) > 0$$

Modulus of Gamma Function

$$\Gamma(1-z)\Gamma(z) = \frac{\pi}{\sin(\pi z)}, \forall z \in \mathbb{C} \setminus \mathbb{Z}$$

Contour Plot of $|\Gamma(z)|$
